

CDS803

COIN DEPOSIT AND RECYCLING SYSTEM

NEW

Lift solution

CDS803

Coins recycling unit with high capacity and high performance. It's the ideal solution for the big retailers and for all the users who need to handle high volumes of coins.

In combination with the CDS803 a lift for drawers has been developed to improve the comfort of the user and reduce the risk of accidents. It drastically reduces the time spent in the back office for the preparation of the daily float and for the cash collection at the end of the day and, through online connection, optimizes the retail/bank/CIT cooperation.

In combination with the SDM504 or the AST7008 (banknotes recycling devices), it allows a complete management of the cash process.

FEATURES

Deposit: 10 coins / s, coins mixed

Input tray capacity: 1000 coins, coins mixed

Dispense: 48 coins / s

Storage recycling: 18,000 coins, 8 coin hoppers
